

Test Case ID	User Story ID	Test Scenario	Feature	Description	Expected Outcome	Actual Outcome	Pass/Fail
1	1	Browsing Software Engineer Jobs	Job Search Functionality	As a software engineer, I want to be able to browse through Software Engineer jobs so that I can review jobs that I want to apply.	Users should be able to search for software engineer jobs, view job details, and save or apply to jobs.	The functionality should work smoothly without any errors	Pass
2	2	Upload Resume and Get Job Recommendations	Resume Upload and Job Matching	As an IT student, I want to be able to upload my resume so that I get a list of jobs based on my skills.	The system should parse the uploaded resume, extract relevant skills, and provide job recommendations that match those skills.	The system should accurately match skills from the resume to available job listings and suggest relevant jobs.	Pass
3	3	Discover Employer and Job Description Details	Job Details Exploration	As a backend developer, I want to discover the values and detailed description of the employer and position so that I can determine if my interests and technical skills are aligned with the relevant job.	Users should be able to view comprehensive details about the employer, including their values, culture, and mission, as well as a detailed job description outlining the responsibilities, requirements, and technical skills needed.	The system should provide accurate and informative details about the employer and job to help users assess alignment with their interests and technical skills.	Pass
4	4	View Dashboard for Available Jobs	Job Dashboard	As a student, I want to be able to see the dashboard to view all available jobs so that I can easily find more jobs relevant to my profile.	Users should be able to access a dashboard that displays all available jobs, making it convenient to find relevant job opportunities based on their profile.	The system should present a user-friendly dashboard with comprehensive job listings that are relevant to the user's profile.	Pass
5	5	Upload Updated Resume on Dashboard	Resume Upload on Dashboard	As a jobseeker, I want to be able to upload a new updated resume on the dashboard so that I can see the jobs as per my updated skills.	Users should be able to upload a new updated resume on the dashboard, and the system should update job recommendations based on the revised skills.	The system should accurately process the updated resume and provide job recommendations aligned with the user's updated skills.	Pass

6	6	Login to Smarthirepro App as a Java Developer	User Authentication and Login	As a Java developer, I want to be able to login on the Smarthirepro app so that I can search for new jobs related to my profile.	Users should be able to successfully login to the Smarthirepro app using their credentials as Java developers and access job search functionality related to their profile.	The login process should authenticate users and grant access to job search features to Java developers.	Pass
7	7	Test Scenario: Registration and Resume Upload on Smarthirepro App	User Registration and Resume Upload	As a software engineer, I want to be able to register to the Smarthirepro app and upload my resume so that I can navigate through all jobs.	Users should be able to register successfully, upload their resume, and access job navigation features on the Smarthirepro app.	The registration and resume upload processes should be smooth, allowing software engineers to explore job listings.	Pass
